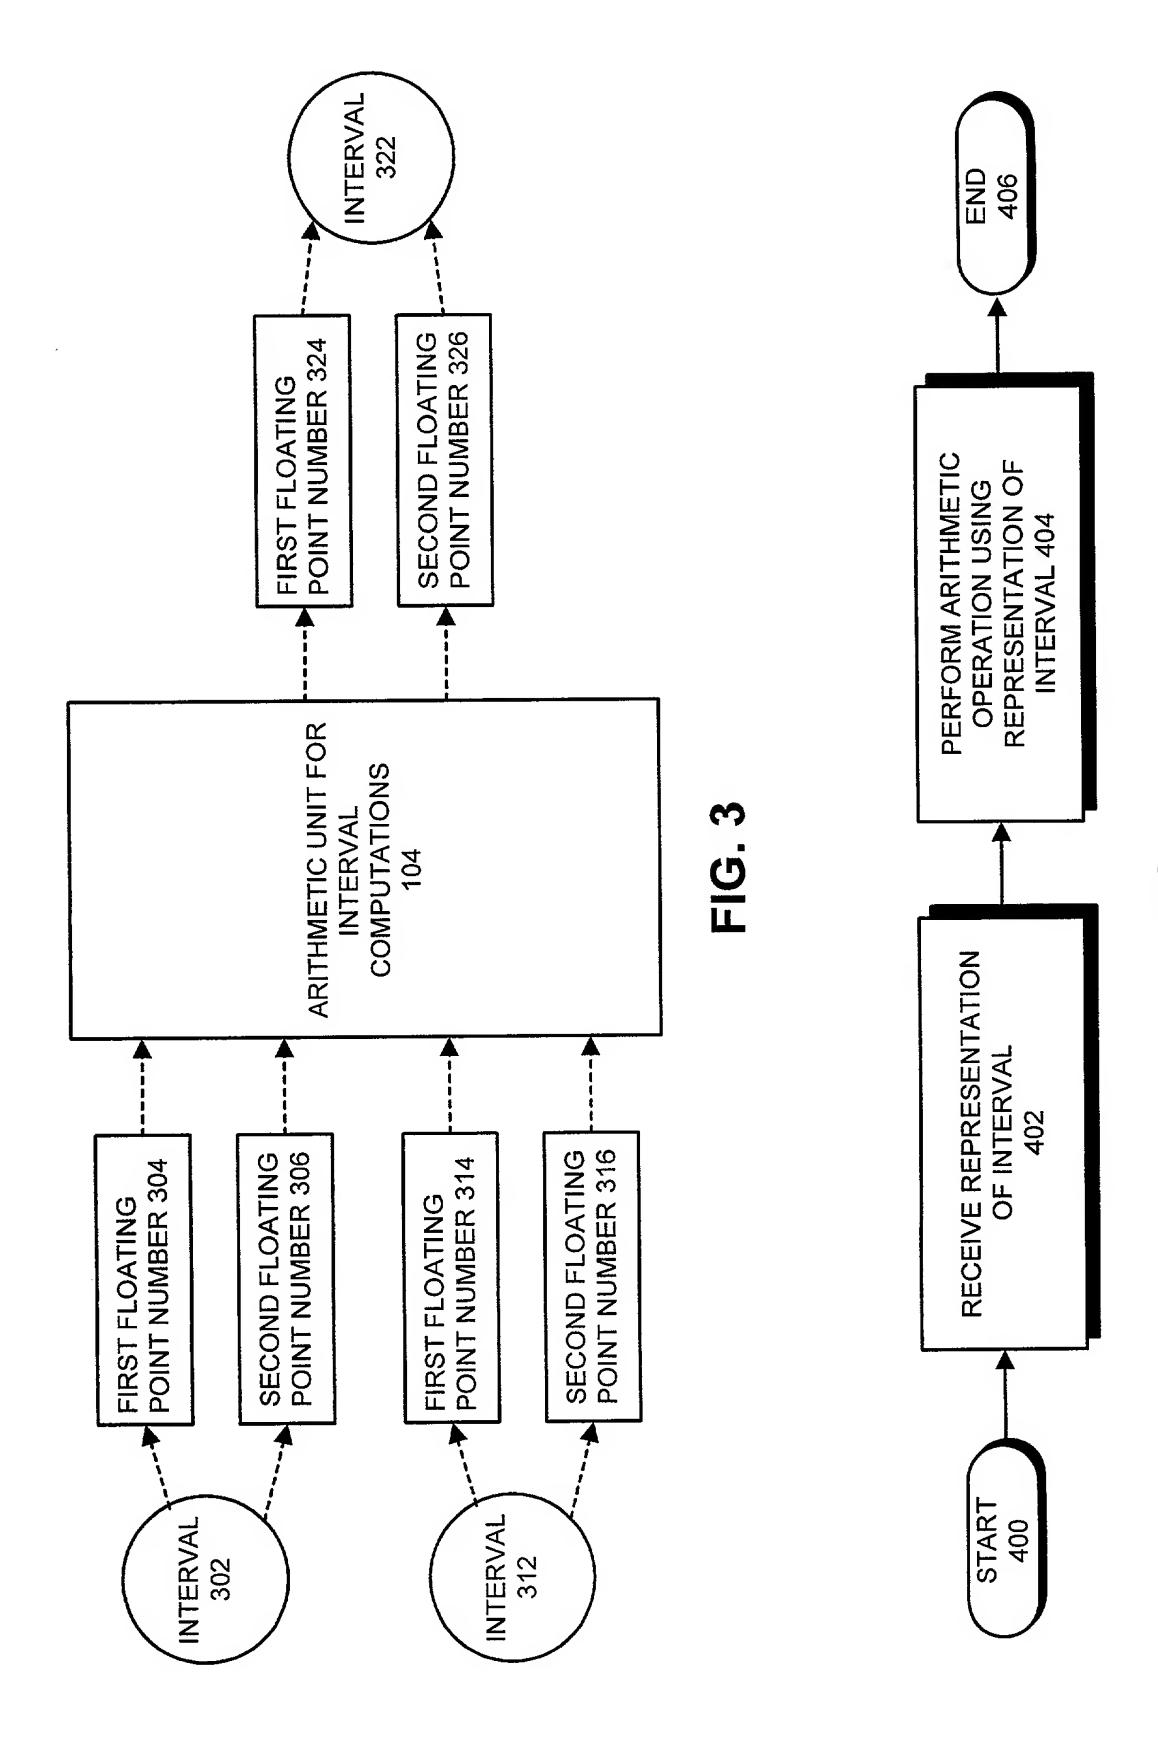

FIG. 4

$$X = \left[ \underline{x}, \overline{x} \right] = \left\{ x \in \Re^* | \underline{x} \le x \le \overline{x} \right\}$$

$$Y = \left[ \underline{y}, \overline{\nu} \right] = \left\{ y \in \Re^* | \underline{y} \le y \le \overline{\nu} \right\}$$

(1) 
$$X + Y = \left[ \sqrt{x} + y, \uparrow \overline{x} + \overline{y} \right]$$

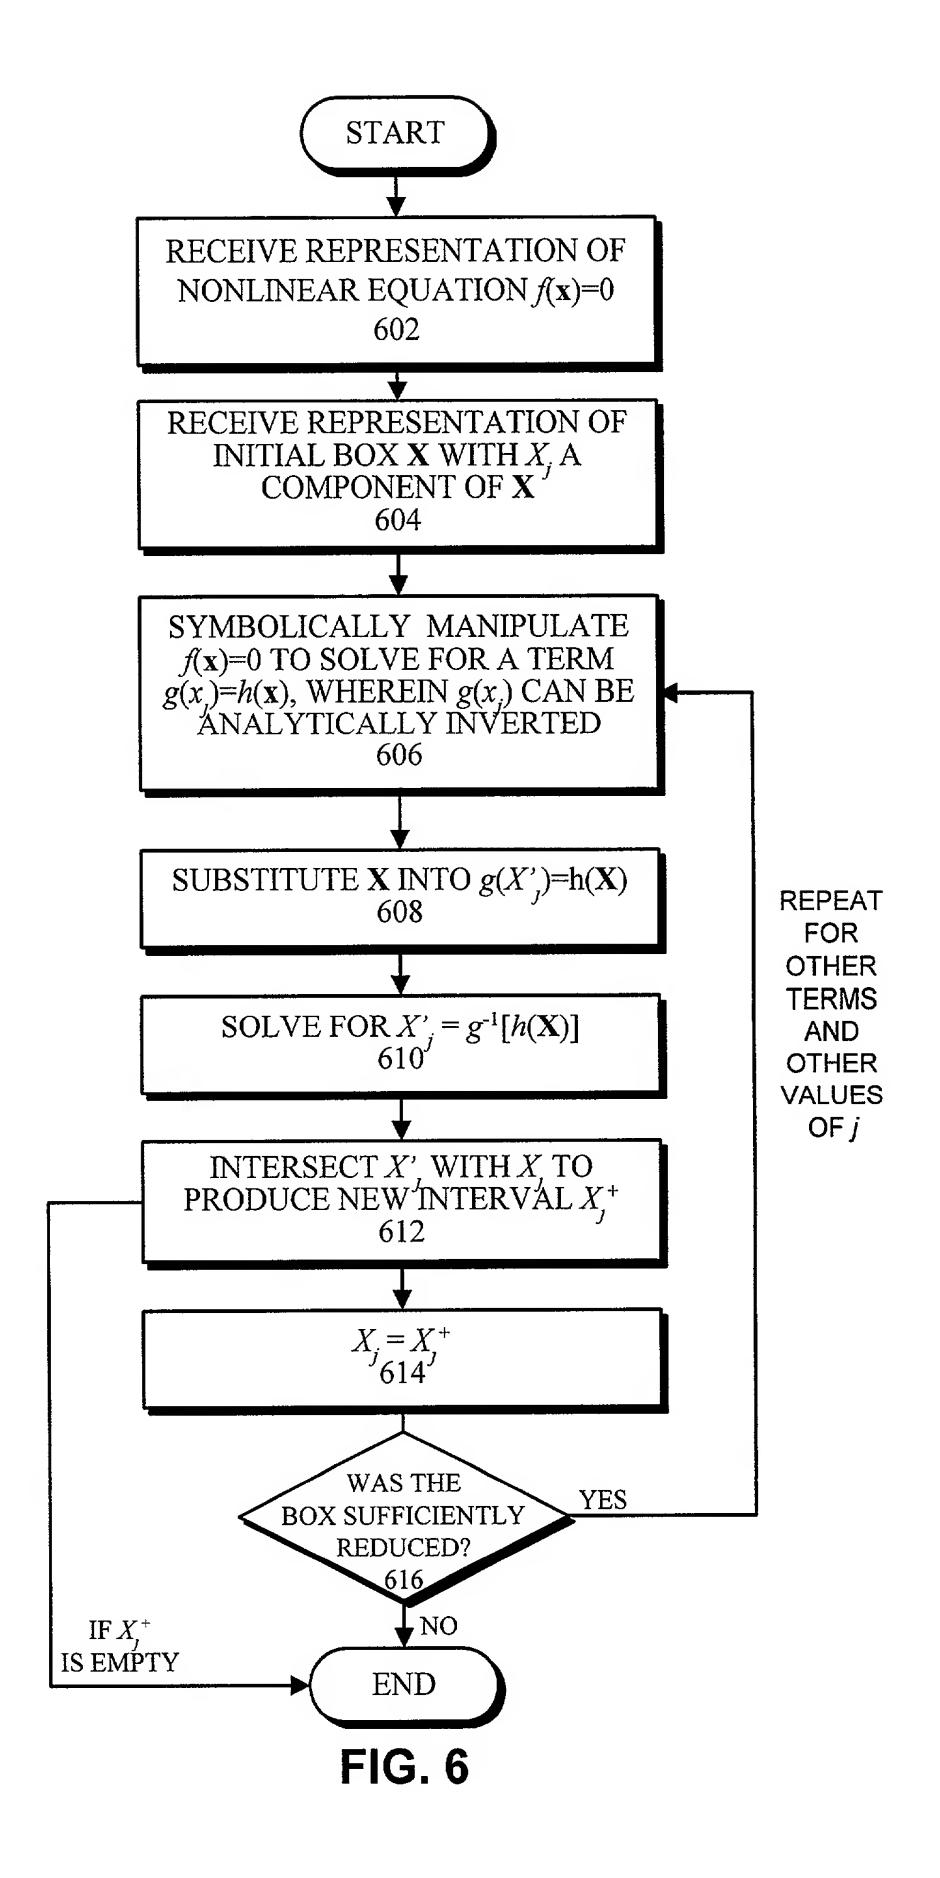

(2) 
$$X-Y = \left[ \sqrt{x} - \overline{y}, \sqrt{x} - \underline{y} \right]$$

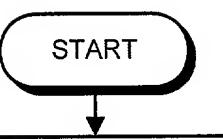

(3) 
$$X \times Y = \left[ \min( \sqrt{\underline{x} \times \underline{y}}, \underline{x} \times \underline{y}, \overline{x} \times \underline{y}, \overline{x} \times \underline{y} \right), \max( \uparrow \underline{x} \times \underline{y}, \underline{x} \times \underline{y}, \overline{x} \times \underline{y}, \overline{x} \times \underline{y}, \overline{x} \times \underline{y}) \right]$$

(4) 
$$X/Y = \left[\min\left(\sqrt{x}/y, \overline{x}/\overline{y}, \overline{x}/\overline{y}, \overline{x}/\overline{y}\right), \max\left(\sqrt{x}/y, \overline{x}/\overline{y}, \overline{x}/\overline{y}, \overline{x}/\overline{y}\right)\right], \text{ if } 0 \notin Y$$

$$X/Y \subseteq \Re^*$$
, if  $0 \in Y$ 

## FIG. 5

FOR EACH BOX IN LIST  $L_i$ , APPLY TERM CONSISTENCY TO EACH OF THE INEQUALITY CONSTRAINTS  $p_i(\mathbf{x}) \le 0 \ (i=1,...,m)$ .

IF  $f_bar < +\infty$ , THEN FOR EACH BOX IN  $L_1$ , APPLY TERM CONSISTENCY TO THE INEQUALITY  $f \le f_bar$ . 702

IF  $L_{I}$  IS EMPTY, GO TO STEP 742. OTHERWISE, SELECT THE BOX IN  $L_{I}$  FOR WHICH THE LOWER BOUND OF  $f(\mathbf{X})$  IS SMALLEST. FOR LATER REFERENCE, DENOTE THIS BOX BY  $\mathbf{X}^{(1)}$ . DELETE  $\mathbf{X}$  FROM  $\mathbf{L}_{1}$ .

APPLY TERM CONSISTENCY OVER

X TO EACH CONSTRAINT
INEQUALITY. IF X IS DELETED, GO

TO STEP 703.

704

COMPUTE AN APPROXIMATION  $\mathbf{x}$ FOR THE CENTER  $m(\mathbf{X})$  OF  $\mathbf{X}$ . IF  $f(\mathbf{x}) > f_bar$ , GO TO STEP 708.

FOR FUTURE REFERENCE, DENOTE THE BOX **X** by **X**<sup>(2)</sup>. DO A CONSTRAINED LINE SEARCH TO TRY TO REDUCE  $f_bar$ .

IF f\_bar WAS NOT REDUCED IN STEP 706, GO TO STEP 709.

APPLY TERM CONSISTENCY TO THE INEQUALITY  $f(\mathbf{x}) \leq f_bar$  OVER THE CURRENT BOX X. IF X IS DELETED, GO TO STEP 703.

708

IF  $w(\mathbf{X}) < \varepsilon_X$  AND  $w[f(\mathbf{X})] < \varepsilon_F$ , PUT  $\mathbf{X}$ IN LIST  $L_2$ . OTHERWISE, IF  $\mathbf{X}$  IS SUFFICIENTLY REDUCED RELATIVE TO THE BOX  $\mathbf{X}^{(1)}$ , PUT  $\mathbf{X}$ IN  $L_1$  AND GO TO STEP 703.

APPLY BOX CONSISTENCY TO EACH INEQUALITY CONSTRAINT. IF  $f\_bar < +\infty$ , APPLY BOX CONSISTENCY TO THE INEQUALITY  $f(\mathbf{x}) \leq f\_bar$ . IF **X** IS DELETED, GO TO STEP 703.

IF THE UPPER BOUND OF  $p_i(\mathbf{X}) \ge 0$ FOR ANY i=1, ..., n, GO TO STEP 726. 711

APPLY TERM CONSISTENCY TO  $g_i=0$ FOR i=1, ..., n. IF THE RESULT FOR ANY i=1, ..., n IS EMPTY, GO TO STEP 703.

A

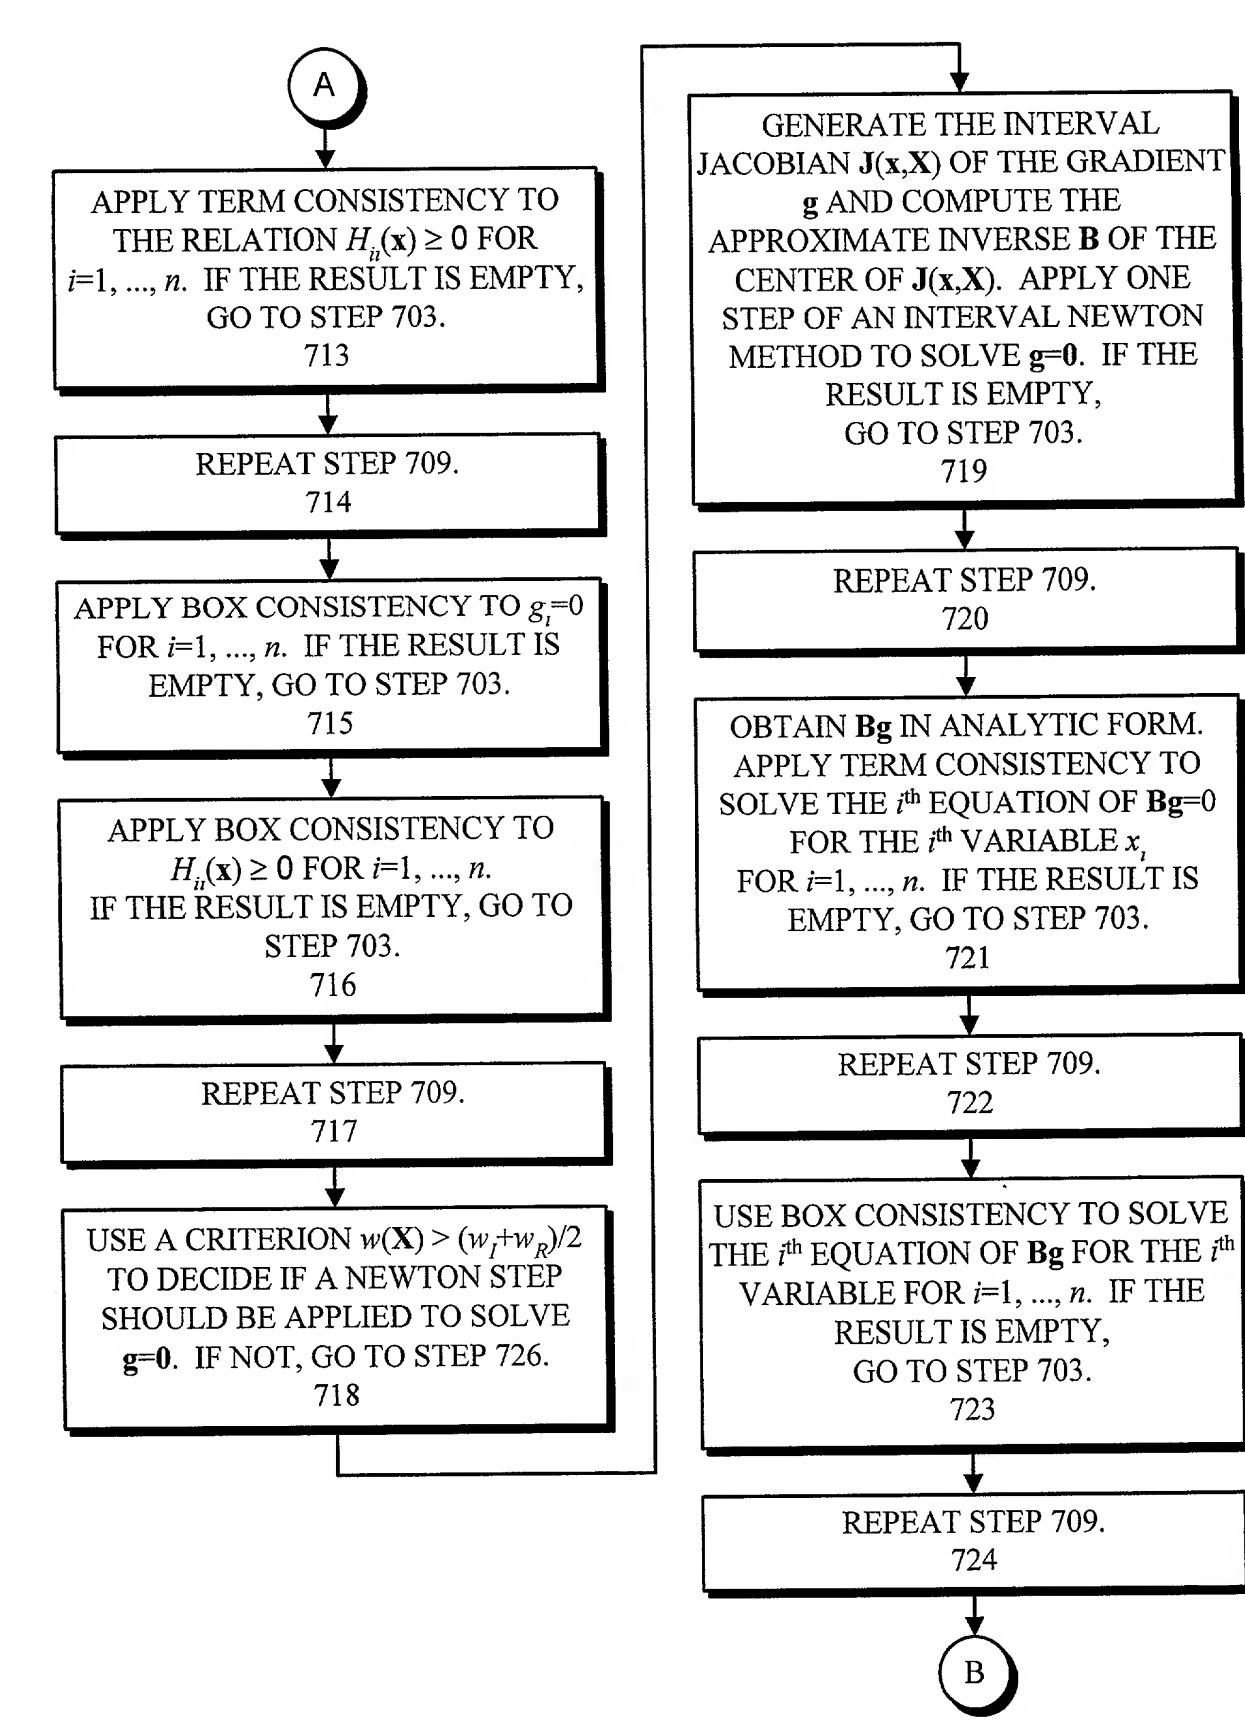

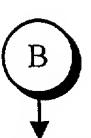

FIG. 7B

USE THE MATRIX B IN A NEWTON STEP TO TRY TO REDUCE  $f_bar$ .

COMPUTE AN APPROXIMATION  $\mathbf{x}$ FOR THE CENTER  $m(\mathbf{X})$  OF  $\mathbf{X}$ . IF  $f(\mathbf{x}) > f_bar$ , GO TO STEP 703.

SKIP THIS STEP AND GO TO STEP 732 IF **X=X**<sup>(2)</sup> IS THE SAME BOX FOR WHICH A LINE SEARCH WAS DONE IN STEP 706. OTHERWISE, DO A LINE SEARCH TO TRY TO REDUCE f\_bar. IF f\_bar IS NOT REDUCED, GO TO STEP 732.

727

FOR FUTURE REFERENCE DENOTE  $\mathbf{X}^{(3)} = \mathbf{X}$ . USE A LINEARIZATION TEST TO DECIDE WHETHER TO LINEARIZE AND "SOLVE" THE INEQUALITY  $f(\mathbf{x}) \leq f_b ar$ . IF THE CRITERION IS NOT SATISFIED, GO TO STEP 732.

USE A LINEAR METHOD TO TRY TO REDUCE X USING THE INEQUALITY  $f(\mathbf{x}) \leq f_b ar$ . If X is deleted, GO to step 703. Otherwise, If this application of the Linear Method does not sufficiently reduce BOX  $\mathbf{X}^{(3)}$  GO to step 731. 729

USE A QUADRATIC METHOD TO TRY TO REDUCE X USING THE INEQUALITY  $f(\mathbf{x}) \leq f_bar$ . IF X IS DELETED, GO TO STEP 703.

REPEAT STEP 709. 731

USE A LINEARIZATION TEST TO
DECIDE WHETHER TO LINEARIZE
AND "SOLVE" THE INEQUALITY
CONSTRAINTS. IF THE PROCEDURE
INDICATES THAT THE
LINEARIZATION
SHOULD NOT BE DONE,
GO TO STEP 739.
732

SELECT THE INEQUALITY
CONSTRAINTS TO BE SOLVED IN
LINEARIZED FORM, AND POSSIBLY
ADD TO THIS SET THE INEQUALITY  $f(\mathbf{x}) \leq f_{bar}$ . IF NO INEQUALITIES
ARE SELECTED, GO TO STEP 739.
OTHERWISE, LINEARIZE THE
RESULTING SET OF INEQUALITIES,
AND SOLVE THE RESULTING SET
OF LINEAR INEQUALITIES. IF THE
SOLUTION SET IS EMPTY, GO TO
STEP 703.

REPEAT STEP 709. 734

733
